And colleagues Establishing promotion opportunities for further education, training, seminars and field trips to develop more competence.

Keywords— Factor, influence, performance.

I. INTRODUCTION

The bureaucracy is the main mechanism in the administration of State affairs, with ministries, bureaucrats and departments as a key gear in their work. Bureaucratic reform puts an emphasis on performance and efficiency, evaluation of bureaucratic performance has therefore become the main tool of bureaucratic reform. Because it gives the bureaucratic system to work in a new way by under the performance of work to produce results and able to measure the work that is served to the people. The evaluation of official performance must consist of two parts: the

performance of the work and the behavior of the government officials. In addition, there must be clear indicators for the evaluation of the performance of government service to be successful and to the maximum benefit of the people (Kitikun,2016). Sustainable bureaucratic development is a challenge in the official organizational culture system. (Rajathsub, 2011) Need to rely on the way of thinking New ways of working in the new bureaucracy (New Public Management) (Tolofari,2005) To be consistent with the rapidly changing environment with a people-centered focus The modular way of thinking should be modified, there should be hyperlinks. In-depth analysis based on function expertise Turn to think in a more holistic or systematically integrated way in all dimensions (Klakayun, & Chansirisira, 2020).

The method of centralized operation has to be modified. Working in accordance with their responsibilities by controlling and supervising them in order of mandatory steps, while developing the bureaucracy is considered a challenge in the organizational culture system, not destroying the interests or impairs the security of the civil servants' lives. To change the public administration system to a new public administration system Which emphasizes the work by measuring achievement There is a measure of concrete results. Transparency with fast and agile administration Able to meet the needs of society properly and appropriately

As a result, the public sector has to rely on the concept and management method of the private business sector more and more. Such private management requires government officials to become more qualified personnel as well as being more "professional". Under many laws and regulations (unlike private administration) and under the rule of law (Rule of Law), the government sector has to change the form of strict government. It adheres to the more lenient principle under the principle of "good governance" or "good governance" but also demands more from government officials every now and then. (Jinarat, & Quang,2003) In affecting the progress of the organization and the success of oneself This causes each person to behave in a way that is sure to achieve certain goals. (Noypa, Trichandhara,& Potipiroon,2020) As mentioned above, the student is interested in studying operational motivation. Achievements and core competencies in performance of government officials under the Office of the Permanent Secretary of Bangkok Metropolitan Administration In order to know how to perform the work to be successful And what
