Terumasa AOKI is an associate professor at NICHe (New Industry Creation Hatchery Center), Tohoku University, Japan. He received his B.E, M.E and Ph.D degree from the University of Tokyo, in 1993, 1995 and 1998 respectively. He has received various academic excellent awards such as Young Scientist Award from MEXT (the Ministry of Education, Culture, Sports, Science and Technology in Japan) in 2007, Yamashita Award and the Best Education Award from IPSJ (Information Processing Society of Japan) in 2001 and 2007 respectively, two Best Paper Awards from IIEEJ (the Institute of Image Electronics Engineers of Japan) in 2004 and 2009 etc. He is well known as the developer of DMD (Digital Movie Director) and NeoPoster etc. His current research topics are digital content technology, especially image processing, computer vision and computer graphics.

Takahiro TAKEUCHI received his B.E. degree from Yamagata University in 2016. He is currently a M.S. student in Tohoku University. His research interests is machine learning.
